nRotax 125 MAX versus typical 100cc kart engines. Presentation Rotax exhaust valve – only for internal use 15 Without commitment to advise modifications Engine concept Rotax engine 125 MAX 0 2 4 6 8 10 12 14 16 18 20 22 30 00 4000 5000 6000 7000 8000 9000 10000 11000 12000 13000 14000

currently imported from China to the U.S. The engine is manufactured in 50cc, 125cc, 150cc and 170cc with big bore kits available in several sizes. The information contained in this manual also applies to the CN and CF 250 Engines. Components GY6 and CN engines have three major components which require lubrication.

engines do not produce usable horsepower above 13,000 RPM has practical applications as well. T Overall these features are unique to Rotax Kart Engines and make for an engine that produces horsepower and lap times equivalent to other high performance 125cc engines and yet uses far less RPM's.

Contents This Repair Manual contains instructions for all the necessary repair and maintenance work on the ROTAX-Engine Type 125 MAX DD2. Table of contents This chapter of the Repair Manual contains general and safety information concerning the operation of the kart engines. Subject Page General note Page 3

Gasoline Engine Owner's Manual z The engines are designed to give safe and dependable service if operated according to instructions. Read and understand this owner's manual before operating the engine. Failure to do so could result in personal injury or equipment damage.

All engines sold by Marcmotor are assembled by experts and, before being delivered, are subject to a quality-check procedure. However, running-in is required. A good running-in ensures long life to the engine and enhances performance of the mechanical components. Before starting the engine, make sure that the carburetor has the right setup.

Two Stroke Performance Tuning a disc partially cut away and attached to the end of the crankshaft opens and closes an inlet port in the side of the crankcase. The Morbidelli 125 twin road racer is a rotary valve engine. The inlet port opens 30° after BDC and closes 79° after TDC. The piston crown opens and closes the exhaust and transfer ports.
